

TABLE OF CONTENTS

Preface.....	i
Prerequisite.....	i
The tutorial files.....	i
Drawing units in this e-book.....	i
Table of Contents.....	ii
The Block Basic.....	1
Block advantages.....	1
Creating Block.....	2
Defining block name.....	3
Defining block base point.....	4
Defining objects.....	5
Inserting Block.....	5
Insert block definition in a file.....	6
Inserting a file as a block.....	7
Nested block.....	8
Inserting block from other file.....	9
Working with Units.....	12
Modifying Block.....	13
Disassemble and redefine block.....	13
Using block editor.....	15
Replacing Block.....	17
Attaching Information to Block.....	19
Creating attributes.....	19
Working with Block and Attributes.....	21
Creating block.....	21
Inserting Block.....	22
Changing Attribute Value.....	23
Managing Attributes.....	24
Attributes to Reserve Space for Text.....	25
Exercise: Create a room tag.....	26
Working with Layers in Block.....	29
Layer 0.....	29
Layer properties override.....	29
ByBlock.....	29
Using other layers.....	30
Exercise.....	30
Changing layers.....	32
Changing object properties.....	32
More layers practices.....	34

Annotative Block.....	35
Understanding annotative block.....	35
Creating annotative block.....	38
Using annotative block.....	40
Adding intelligence to your block.....	41
Using visibility states.....	41
Adding objects to current state.....	47
Controlling visibility states.....	47
Changing parameter name	48
Using parameters and actions.....	49
Adding parameters.....	49
Link action to parameter.....	52
Testing block.....	54
Parameter properties.....	55
Linking stretch action to opposite direction.....	56
Limiting size using list.....	58
Create a list of column size.....	60
Controlling block with constraints.....	65
Using dimensional constraint.....	67
Changing parameters value.....	71
Using geometric constraint.....	72
Using auto constrain.....	74
Using block table.....	78
More about dynamic blocks.....	83
Extracting Data.....	84
Information in your blocks.....	84
Attributes.....	84
Parameters.....	84
Using fields in Attributes.....	84
Using data extraction.....	85
First page: Begin.....	85
Second page: Define data source.....	86
Third page: Select objects.....	87
Fourth page: Select properties.....	88
Fifth page: Refine data	89
Page 6: Choose output.....	90
Page 7: Table style.....	91
Page 8: Finish.....	93
Updating data extraction.....	95
Linking data extraction to external excel file.....	97
More Block Best Practices Samples.....	101
Example 1: Building elements sample.....	101
Example 2: Automatic Aligning Valve.....	101

Alignment parameter.....	101
Wipeout.....	102
Example 3: Foundation pile cap.....	104
Add reference points.....	104
Adding attributes.....	104
Example 4: Coordinate label	108
Example 5: Adjustable table length.....	109
Managing and Sharing Blocks.....	110
Managing block files.....	110
Single block in single file.....	110
Multiple blocks in single file.....	110
Creating and using tool palettes.....	111
Adding blocks to tool palette.....	111
Creating new palette.....	111
Creating palette using Design Center.....	112
Creating palette group.....	113
Sharing your blocks to your team.....	114
After you finish this book.....	116
